PREFINISHED BUILDING MATERIALS

- A. In most areas, normal rainfall is sufficient to keep the shingle-shake surface clean. Where an unusual amount of dirt is deposited on the surface, a simple cleaning proce dure should be scheduled annually or more often if conditions demand. For surface dirt, the use of ordinary non-abrasive household detergent is recommended.
- B. For severe conditions use the following solution:
 - 1/3 cup ordinary non-abrasive household detergent (i.e. Tide) 2/3 cup trisodium phosphate (i.e. Spic N Span) 1 gallon water

CAUTION: Stronger concentrations of cleaners can cause damage to the finish. Rinse the surface with clear water immediately after cleaning. Avoid skin contact or getting the solution in the eyes. Always wash the shingle shakes from the bottom to top and keep rinsing thoroughly with fresh water while cleaning.

- c. In some areas, mildew may be a problem. It appears as black spots on the surface dirt and is usually detected in areas not subjected to rainfall. For removal, prepare a solution as follows:
 - 1/3 cup powder detergent (i.e. Tide)
 - 2/3 cup Trisodium Phosphate (i.e. Spic N Span) 1 quart 5% Sodium Hypochlorite (i.e. Clorox)

 - 3 quarts water.

CAUTION: Greater amounts of concentration may cause damage to the finish. Always test any cleaner on an inconspicuous area before application to major areas. Excessive rubbing will create an undesirable glossy finish.

D. We are pleased to add you to our long list of satisfied customers and we hope you'll recommend our products to your friends and neighbors. We know you'll benefit from these prefinished building materials for many years to come and thank you for your purchase.
