BUILT TO LAST • MATCHING GUTTERS • RESISTS ICE DAM BUILDUP • WIDE VARIETY OF COLORS

Style Performance

Design and Performance

Our talented team of engineers researched the effects of long-term exposure to temperature extremes, moisture, and air pollutants. The result is a soffit and fascia system that exceeds all building code requirements while maintaining our high standards for design and 'curb-appeal'.

Extreme Durability

Our exclusive eight-stage baked-on coatings are corrosion-resistant and withstand even the harshest outdoor conditions for decades. We back our product with industry's best warranty. Period.

Energy Efficient

Our unique center vent and full vent soffit panels help to control energy costs during the summer and ice dam buildup during the winter.

Lasting Beauty

Our products are color-coordinated with Crestline, Vetter, Marvin, and Andersen, as well as other manufacturers of prefinished windows. EDCO's aluminum soffit and steel fascia systems are available in colors to match our siding, roofing, and gutters — which complement new homes as well as remodeling projects.
