

Applying Color Matched Paints to Prefinished Metal Building Products

Occasionally, there may be a need to apply a small amount of touch-up paint to ensure that EDCO's metal exterior building products will retain the same consistent look for years to come. However, it is critical that the correct type of paint is used to maintain the products integrity.

There are three types of color matched paints available from EDCO:

- 2-ounce touch up bottle
- Touch-up pens
- Spray cans

Touch-up bottles and pens are the only TWO options to be used on EDCO's prefinished metal building products which includes roofing, siding, rainware, soffit, fascia and trim materials. These two touch-up options consist of paint that will not damage the finish used to manufacture EDCO's metal products.

Spray paint on metal finishes could result in damaging the factory baked finish. Possible discoloration can also result over time if spray paint is used. It should only be used on small accessory items such as siding blocks, louvers, dryer vents, etc.

If you have any questions related to the selection of the appropriate touch-up paint, please contact our customer service department at 800-593-2680 or 952-945-2680.
